WEISCHER

1 2 3

P. 04-05 Precision

A good and a perfect result are worlds apart. Get to know why.

P. 06-07 Trust

Trust in yourself and your partners. This is a good foundation for success.

P. 08-09 Innovation

We make use of new findings and technologies - for us and our customers.

4 5 6

P. 10-11 Competence

Who knows exactly what he is doing can make conscious decisions - and substantially profit from it.

P. 12-13 Courage

Our strength lies in recognising new paths and consciously going forward.

P. 14-15 Community

Whether in private life or in a company: family values create stability.

7 8

P. 16-17 Tradition

If you know where you come from, trade and high-tech are no contradiction.

P. 18-19 Service and Aftersales

A good partner is always at your service - no matter if before, during or after a project.

Perfect quality is no coincidence. In gauge and tool making and plant engineering very small details decide on the success of a project. You have to master your trade and moreover make creative use of modern technological knowledge if you would like to provide new impulses to the market and be a step ahead of the competition.

In this brochure, we would like to present you our philosophy - the building elements of our success.

PRECISION

If we talk about precision, it is mainly about reaching a goal as closely as possible. We at Weischer have a completely different commitment: Perfection.

The most successful automotive brands in the world trust in our solutions, since they know that compliance with industrial tolerances is not good enough for us. They choose us, since our ideas of precision are not within the range of a tenth of a millimetre, but of a hundredth of a millimetre. They are aware that every further step in direction of perfection directly increases the value of their product and the vehicle brand. Weischer is the world's unrivalled leader in this discipline.

Why we of all companies have been successful in this for decades? Because we are perfectionists who are not satisfied when reaching a goal. Because for us, perfection does not end with the perfect product, but with the perfect process. In combination, we create the special value for our customers: Very precise products plus economic production equals complete peace of mind.

TRUST

Granted: In our long-standing history, we have always been profiting from our customer's trust. Our many ideas to further improve gauge making, tool making and plant engineering could not have been implemented without this trust. The result why we are still here today - and stronger than ever: We can validate the trust given to us and exceed the expectations in many cases. Trust is the motor of our success. Why is this so? Because trust spurs us in all decisive areas: Quality of work. Responsibility. Reliability. Adherence to schedules. And above all: Fairness towards our customers and partners who place their trust in us.

We trust each other. And we trust our partners. Like this we can reach our goals together.

INNOVATION

It is the nature of the engineer to make things differently - to make them new. Our approach: We could like to make things better. Innovation is never an end in itself to us. It always follows a clear goal. While many occupy themselves with very small details to achieve improvements, we also embark on a different path: We rethink the process as a whole - and think it out till the end. Here we find completely new solutions that open up in sum unparalleled possibilities to our customers. Some of these developments do not happen from today to tomorrow. However, they always happen fast - and in the end the result speaks for itself. The result is growth, both for us and our partners.

We make use of new findings and technologies - for us and our customers.

WEISCHER

COMPETENCE

The proficiency of a company is linked to many factors. Every company has its own idea about this. We at Weischer are convinced that the combination of technical knowledge and skills, experience, flexibility and spectrum are the foundation for competent behaviour. Only who knows the consequences of his actions very well can work in a responsible and target-oriented manner. Only who is flexible enough to unite his technical knowledge with free thinking, will find solutions that are unique in their quality and efficiency. Competence can be experienced at Weischer at every point: in the advice given to our customers and in the understanding of their processes, in the quality of our products, solutions and services, and obviously in our daily interpersonal dealing with colleagues and partners.

Most precise measuring and testing equipment for OEMs and system suppliers

The accuracy of fit in parts production depends on very precise measurement and testing equipment. In this sector, Weischer offers OEMs and system suppliers a wide programme range. For the OEM segment we manufacture control devices, sectional gauges, measurement gauges, data control models and cubes. Our gauges are used in the interior and exterior area.

We are at your side with advice and support from the specification of your enquiry to the validation, and always apply all our experience to provide you with the best possible test equipment. Among our clientel there are renowned manufacturers from the automotive and commercial vehicle industry as well as from aerospace technology.

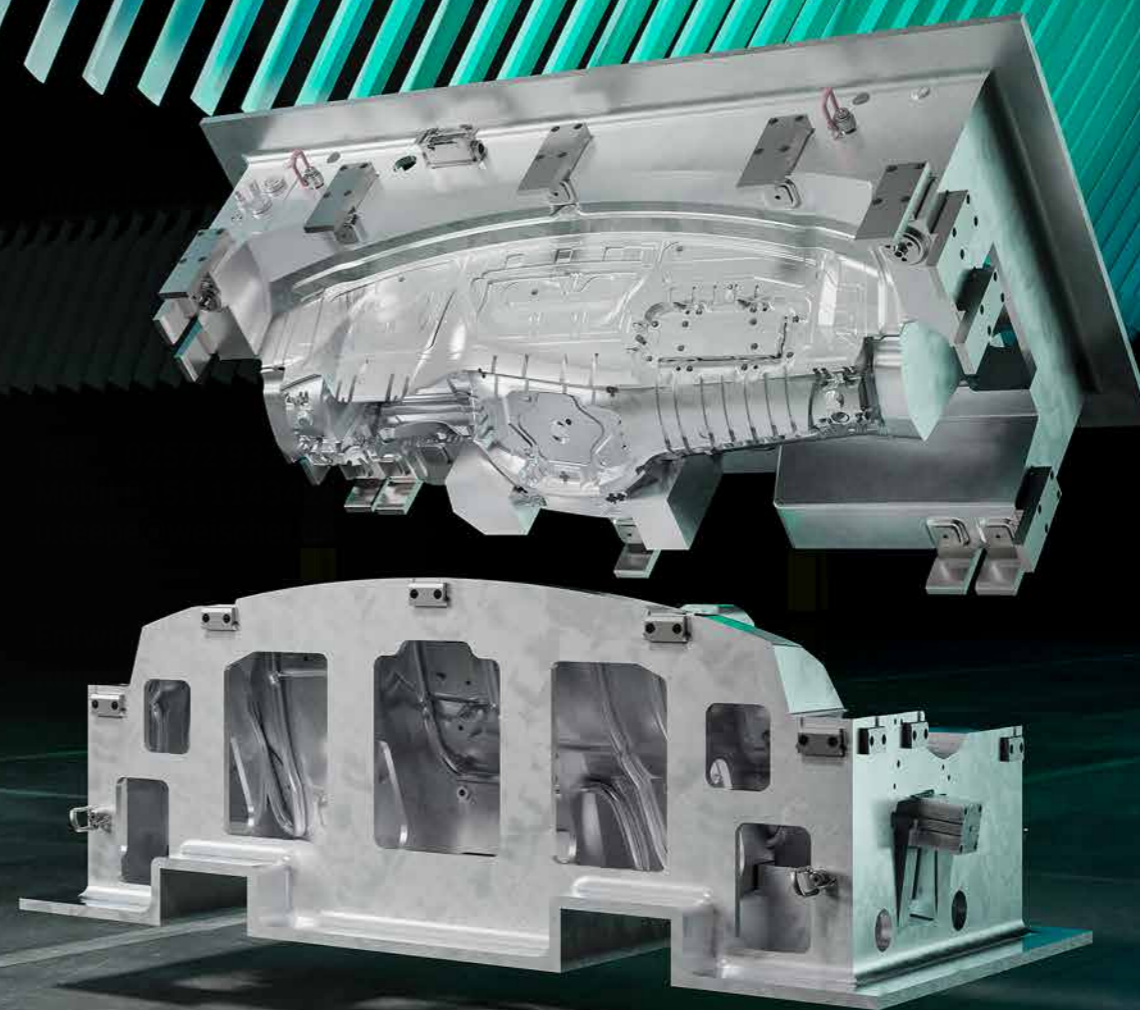

GAUGE MAKING

Product range

Moulds for particular requirements

When it comes to the construction of moulds for special technologies, we are among the world's leading experts. Whether it is in the processing of PUR that we perfect with the manufacture of foaming and back-foaming tools or in tool making for thermoforming, vacuum forming, vacuum or press lamination: At Weischer you get products for industrial manufacturing in a precision and quality that can rarely be found on the market. Moreover, our own development gave birth to stencilling with special specifications for the 2-colour slush process- If requested, we deliver fully-automated systems including control technology for all moulds.

TOOL MAKING

PLANT ENGINEERING

Faster, more productive, more efficient, and more flexible

With plant engineering we offer our customers unique advantages for production. For this purpose, we use our special knowledge and know-how all about the modern production processes and requirements, in particular in the automotive industry. Production system developed by Weischer connect production technology, materials handling and control technology in a way that production processes are improved in a number of ways. This significantly reduces costs for the installation, processing times are shortened, provision timings optimised and intermediate storage capacities are drastically reduced - whilst keeping personnel expenditure at a minimum. This groundbreaking development is made possible by means of thinking that a process is always viewed in its entirety. In this process, all potentials are discovered step by step and integrated in the system in a targeted manner.

COURAGE

THEY SAY THAT COURAGE IS REQUIRED TO TAKE A BIG STEP. THERE IS SURELY SOME TRUTH IN THIS. THE EXPANSION OF PROVEN WAYS CAN SURELY BE A RISK. HOW DO WE FACE NEW CHALLENGES AT WEISCHER? WITH OPENNESS. WE UNDERSTAND THE GOALS OF OUR CUSTOMERS SINCE WE LISTEN TO THEM. WE DARE TO SHOW OUR CUSTOMERS NEW

Ludwig Borchert, Managing Director, Manager Sales and Project Management

WAYS SINCE WE ARE CONVINCED ABOUT THEM. AT THAT MOMENT WHEN COMMON CONVICTION TURNS INTO A COMMON GOAL, WE DO NOT HESITATE, BUT PROCEED UNANIMOUSLY. ON THE ONE HAND THIS HAS TO DO WITH COURAGE. ON THE OTHER HAND, YOU MIGHT AS WELL CALL IT SELF-CONFIDENCE. WE BELIEVE IN WHAT WE DO. ON THE BASIS OF THIS BELIEF WE TAKE CONSCIOUS DECISIONS SETTING NEW STANDARDS FOR AN ENTIRE INDUSTRY.

COMMUNITY

Stephan Weischer about family and entrepreneurial values

Our company receives its credibility from honest values that it openly lives and represents. The values for which the Weischer company stands and which make us strong, are also exactly the values I find in the circle of my family. Two separate worlds – one philosophy. We know that we as a business, just like a family, consist of many personalities. Each of us has particular strengths and we have a common goal. We concentrate on

bundling our strengths so that everybody can give his best for the greater good. How we do this? By means of communication, motivation and targeted promotion of talents. Thanks to this, our company maintains its own identity, its unmistakable profile. We are a strong partner for our customers who speaks with a single voice despite all variety.

TRADITION

Originally, Weischer came from traditional workmanship. This is at the same time our origin and also the reason why we are leaders in technology. Wherever workmanship encounters boundaries of precision and performance, we have broken through the same with technological innovation. This principle to find a solution to a task first from a technical perspective has been maintained until today. Fortunately, for the best solutions for challenges have always been existing in their simplicity and the pragmatism they are met with. In this point, we are not afraid to be consciously old-fashioned. However, when it comes to bring in a solution to perfection, the means used cannot be modern enough for us.

At Weischer, the attachment to the company joins generations: Father and son at their joint work.

SERVICE AND AFTERSALES

For us, perfect service never ends with the handover of a finished product or the installation of a system. We at Weischer rather think also in terms of processes when it comes to service. The process starts with an idea, which is refined and thus turns into a project. This is followed by the development, the parallel consulting provided to our clients. This is complemented by design and implementation. When delivery gauges and tools or during the installation of entire systems we offer targeted startup support to ensure that everything goes just as planned. Even long after the commissioning we are always available when it comes to modification requests, optimisations, repairs and maintenance work. No matter what it is about or at what point of the process you are: Weischer is always at your side.

Proximity to the customer: Fast and competent service always comes first for us in every step of the process.
